

Bimetal thermometer Model 53, industrial series

WIKA data sheet TM 53.01

for further approvals
see page 6

Applications

- Chemical industry, petrochemical industry, process technology and food industry
- Facility management
- For aggressive medium

Special features

- Universal application
- Case and stem from stainless steel
- Bimetal with zero point setting at the back of the case
- Nominal size 3" and 5"
- Embossed dial (no parallax reading errors)

Bimetal thermometer

Fig. right: adjustable stem and dial version,
model S5301

Description

This series of thermometers is designed for installation in pipes, vessels, plant and machinery.

Sheath and case are made of stainless steel. To allow fitting to the process, different installation lengths and process connections are available. Through the high protection class of the thermometer (IP65) and its liquid damping, operation under high vibration conditions is possible.

The imperial nominal sizes are commonly used in North American and related markets.

Standard version

Measuring element

Bimetal coil

Nominal size

3", 5"

Connection design

S Standard (male thread connection) ¹⁾

1 Plain stem (without thread)

2 Male nut

3 Union nut (female)

4 Compression fitting (sliding on stem)

5 Union nut with fitting

1) Not for version "adjustable stem and dial"

Models

Model	NS	Version
A5300	3"	Back mount (axial)
A5301	5"	
S5300	3"	Back mount, adjustable stem and dial
S5301	5"	

Accuracy class

EN 13190

Working range

Normal (1 year): Measuring range (EN 13190)

Short time (24 h max.): Scale range (EN 13190)

Case, bezel ring

Stainless steel 1.4301 (304)

Stem, process connection

Stainless steel 1.4571 (316Ti)

Dial

Aluminium white, black lettering

Window

Instrument glass

Pointer

Aluminium, black, adjustable pointer

Zero adjustment

on the rear of the case, external

Insertion length L₁

63 ... 1,000 mm

minimum/maximum length depends on the measuring range and diameter

Permissible pressure rating of stem

max. 25 bar, static

Permissible ambient temperature at case

-20 ... +60 °C max. (others on request)

Temperature limits for storage and transport

-20 ... +60 °C (EN 13190)

Ingress protection

IP65 per IEC/EN 60529

Options

- Scale range °F, °C/°F (dual scale)
- Liquid damping up to max. 250 °C (at the sensor)
- Laminated safety glass, acrylic plastic
- Stem diameter 6, 10 mm
- Ingress protection IP66
- Special measuring ranges or dial printing to customer specifications (on request)
- Version per ATEX

1) With scale ranges $\geq 0 \dots 300$ °C the dimensions increase by 40 mm

Thermowell

In principle, the operation of a mechanical thermometer without a thermowell with low process-side loading (low pressure, low viscosity and low flow velocities) is possible.

However, in order to enable exchanging the thermometer during operation (e.g. instrument replacement or calibration) and to ensure a better protection of the instrument and also the plant and the environment, it is advisable to use a thermowell from the extensive WIKA thermowell portfolio.

For further information on the calculation for the thermowell, see Technical information IN 00.15.
